EDUCATION

Palestine Technical University - Kadoorie
BSc in Computer Systems Engineering

Tulkarm, Palestine
September 2020 – July 2025

Aarabh Abu Jihad High School
Tawjihi (Scientific Stream)

Jenin, Palestine
August 2019 - July 2020

EXPERIENCE

Front-end Internship
Remotely

Foothill Technology Solutions, LLC.
February 2025- July 2025

- Developed React applications with TypeScript, HTML, CSS, and JavaScript, leveraging Node.js for back-end interactions.
- Implemented Storybook for component development, documentation, and visual testing to ensure reliability.

COURSES

Front-end Web Developer
Online

Udacity
October 2024 – January 2025

- Learned HTML, CSS, and JavaScript basics.
- Worked with Node.js and fetching data from APIs.
- Understood how Webpack helps in building projects.

PROJECTS

Travel Booking Platform: a web app for booking travel accommodations, using React. Features include search filters, user reviews, secure payments, and interactive maps. ([GitHub](#)).

Graduation Project - MY ROAD: a full-stack financial management system for a cold asphalt factory, digitizing sales, purchases, expenses, payments, and employee attendance. ([LinkedIn](#)).

Full Stack Node App: a full-stack app using React for the frontend and Node.js for the backend. Built with MUI and MongoDB. ([GitHub](#)).

My Portfolio: a personal portfolio built using HTML, CSS, and JavaScript. ([GitHub](#)).
